---

Here's a draft agenda for Thursday's meeting - see you at 1:00!

## **DRAFT AGENDA**

### **1. Framework for evaluating stormwater risk (see attachment)**

This lays out the approach we've been discussing in a Q&A format.

- Are the objectives on target?
- Does it capture the important questions?
- Does it explain our rationale accurately?
- Is this an effective communication tool?

### **2. Pros/Cons (see attachment)**

Note: This just came together today so I haven't had a chance to get review/input from others.

- Does this serve the purpose Rick was describing?
- Are these the right questions? Answers?
- Where do we want to go with this?

### **3. Modeling Workplan (see attachment)**

This is the first round of model runs we are thinking of asking Bruce to do. He would probably be able to complete this work and report back to us at our next meeting (September 21).

- Are we clear and in agreement about the objectives?
- Are these the right questions (for starters)?
- Have we selected appropriate data sources for model inputs/settings?
- Where do we go from here?

### **4. Meeting with the LWG**

- What are our objectives for meeting with the LWG?
- What materials do we need?
- What's the timeline? Who will set up the meeting?
